

Burlap Wall Snowman

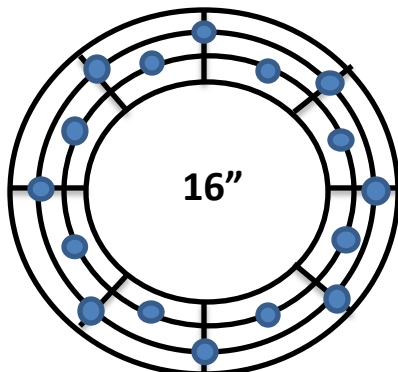

You'll Need:

- 1ea – 14” Wire Wreath Form
- 1ea – 16” Wire Wreath Form
- 2 rolls – 18” Burlap
- 1ea – Snowman Head
- 2ea – Pine w/Bell Spray
- 1ea – Snowman Sign
- 1ea – Corn Cob Pipe
- 1 pkg – Bells
- 1 pkg – Wood Snowflakes
- 2 pkg – Tan Chenille Stems
- 1 ½yd - #40 Ribbon (for scarf)
- 1yd - #9 Ribbon (for bow)

Directions:

1. Take one of the wire wreath forms, it doesn't matter which you start with. Starting with the second ring from the outside, tie a chenille stem around each crossbar with the ends pointing up. On the third ring from the outside, tie a chenille stem on the ring in the middle between each set of crossbars. Do the same with the other wreath form. The 14” form should have 14 chenille stems on it and the 16” should have 16 stems on it. The stems should be arranged in a kind of “zig-zag” pattern around the ring. **Below are examples of each form. Dots are chenille stem locations.**

2. Pick which wreath form you'd like to start with. Start your burlap on the outer ring. Tie the end of the burlap down with the first chenille stem. Take 10" of the burlap and bunch it up. Tie the end of the 10" strip down with the next chenille stem. Go all the way around the ring using this process. Once you have tied the last stem on the outer ring, go onto the inner ring, but **don't cut your burlap!** Repeat this process on the inner ring. Once you've gone all the way around this ring, bunch the leftover burlap from one side of the wreath form to the other and cover the middle of the form. Use a whole roll of burlap for each wreath form! This will make your snowman look much fuller. Tie your burlap off with a chenille stem or glue it down at the end. Fluff the burlap to cover any holes. Repeat this entire step with the other wreath form.
3. Tie the wreath forms together with a chenille stem. Poke 2 holes in the bottom of the snowman's head and use those holes and a chenille stem to tie the head onto the 14" wreath form. **Be careful!!!! The snowman's head has a sand bag in it, so be sure to not poke a hole in the bag or all the sand will come out and you'll have a snowman with a flat head.** ☹️ You can also add some glue to the ribbon on the scarf and attach that to the burlap to help stabilize the head. Tie a bow and glue it near your snowman's head.
4. Stick the arms into the burlap and hang the snowman sign on one of the stems. Glue the bells down the middle and glue the snowflakes anywhere you'd like! *We added one to the scarf, the hat, and the other arm.* Poke a little hole in the snowman head for the corn cob pipe and you're done! 😊
