1ea	Folk Art Enamel Paint Wicker White	4001
2ea	Long "Saying" Signs	
2ea	Mason Jar Lights	1024256
1pkg	Velcro Circles	90071
1ea	E-6000 Glue	
1ea	Snowman Head	2356240
1ea	Merry Christmas Tag	FR-8087
1 can	Clear Varnish	35804830
	Clear Glue & Red Glitter	
1ea	Folk Art Metallic Silver Sterling	662
1pkg	1" Nails	143734
1ea	36" Tree	028645
1ea	140ct Deco Lights	LT140-2
2ea	Snowman Head Ornaments	Your Choice!
1ea	Pine Spray (for wreath)	YSP112-GR
	Use small berries & tie small bow for wreath.	

1. Paint all of your crates with the red Ceramcoat Paint. You can also spray paint them if you want! Once they're dry, it's time to glue all of your crates together. You can use just the E-600 to glue the crates together, or you can place the E-600 on your surface and use just a few drops of hot glue to make the crates stick a little tighter sooner. To arrange your truck, glue one of your mini crates to the top of the large crate, with the opening of the mini crate facing outward. This is where your little snowmen will sit! To make the front of the truck, glue the 2 remaining mini crates together, with their open sides facing each other. You should have one solid block once you're done. Then just glue this to the front of the large crate. Once you have your truck base together, spray the entire truck with the spray sealer.
2. Paint your tires with the black Ceramcoat paint and the silver sterling metallic paint. Measure where you want your tires to go, and use your E-6000 to glue the tires into place. For extra strength, use some of the 1" nails and nail the tires into place. Glue your "saying signs" onto the front and back of the truck to make your bumpers, and glue your Merry Christmas tag onto the back bumper.
3. For the brake lights on your truck, paint the tops of your jar lids white. Squirt some clear glue onto the top of the lid in the middle, and sprinkle some red glitter on top. You can use your finger or a paint brush to get the glitter all over in the center of the lid. For the front lights, you want to glue the lid for a wide mouth jar to your truck. Then you want to connect the lid for a regular mouth jar to the light provided in your kit. Place your Velcro dots on both of the jar lids and make sure they stick! This is how you will turn your truck's lights on and off!
4. Pick out some snowman head ornaments and stick them in the "seat" of your truck. If you need, get some ribbon to make scarves for them.
5. Cut your pine pick and arrange it into a circle to make the wreath for the front of the truck. If you have some red berries and extra ribbon, you can add those to the wreath as well!
6. You can put whatever you want in the back of your truck! We used a 36" Christmas tree and put some lights on it. But you can add snow, Christmas gifts, whatever you'd like!
7. You're done! 😊
