

Create your own Mercury Glass

Supplies: Glass jar or bottle

[Krylon Looking Glass Spray Paint](#)

White Vinegar

Water

Spray Bottle

Paper Towels

Step 1: Mix equal parts White Vinegar and Water in a spray bottle and shake until mixed.

Step 2: Lightly mist your glass bottle with mixture (this should just create small bubbles on the surface, you should Not spray enough that it runs)

Step 3: Immediately spray a light coat of the Looking Glass over entire surface. Be sure to just spray a Light coat otherwise this will not turn out correctly.

Step 4: Repeat Steps 2 and 3 one more time and let dry for about 2 minutes

then take your paper towel and gently blot the glass so that the bubbles pop and you can see some discoloration.

Step 5: Repeat entire process at least one more time, if you are satisfied with color then let dry for 3 hours and you have beautiful Mercury Glass!

If you want a little more color simply repeat the process until you are happy with the results.
